

# Azerbaijan Sustainability Plan 2023

## Roadmap to 20% Carbon Emissions Reduction

**Choices to achieve emission reduction target.**

Prevent all LOPC events.

TRS companies tie into the rig hydraulic system so to eliminate power pack to run 3rd party equipment.

Form Alliances which in return shall reduce POB through multi-skilling.

Set up operations centre so vendors can work remotely in the Turan office.

Reduce the number of diesel-powered engines on Chirag.

Use +veDRILL Tablets to reduce paper.

Lighting switches so unrequired lights switch off during daylight hours.

Change out all lights to LED

Use UAVs for asset inspections and delivering minor spares.

Replace Fossil based lubricants with green ones.

Introduce KCADeutag Carbon Emissions Monitoring (CEM) technology to monitor all emissions of the drilling equipment.
